

Certificate III in Information Technology (VDSS)

COURSE CODE: ICT30120

(Partial Qualification)

Description:

Interested in how technology connects the world? This course is a great introduction to the fast-growing IT industry and helps you build practical skills for a wide range of future careers. This course is designed to provide students with a foundational knowledge of IT, Networking and Basic Programming, and can offer students a hands-on experience with tools such as Microsoft Teams, Oracle VirtualBox, and Cisco Packet Tracer, and can be a stepping stone into further IT training or study.

You will learn things like:

- Install and configure computer hardware and software
- Set up and manage small networks to meet client needs
- Use diagnostic tools to troubleshoot IT issues
- Apply cyber safety practices and data security basics
- Understand how IT supports industries like business, education, and government

Does this sound like you:

- Enjoy solving problems and thinking analytically
- Are interested in computers, networks, and emerging technologies
- Have good attention to detail and logical thinking skills
- Can work independently and are interested in learning how to provide quality customer support
- Are willing to learn new digital tools and software, including building web pages
- A creative approach to problem-solving will also support your success in the IT field

INFORMATION PROVIDED AS A GUIDE ONLY.
