

COMMUNITY – Sustainability – AGRICULTURE

STUDENT

Overview:

You'll see how farming links to community wellbeing

For students who:

- Care about sustainability, education and community wellbeing
- Enjoy science, communication or social subjects
- Morrisby traits: Social-Investigative (enjoy guiding, teaching and supporting others with practical outcomes)

What you might do across the week:

- Induction and sustainability overview
- Shadow community engagement team
- Assist with education materials
- Visit a farm or project site
- Work on a mini awareness project
- Share reflections with mentors

Activity	Purpose
Tour of community farm or garden	Builds familiarity with environment
Assist with planting or maintenance	Builds connection and contribution
Shadow sustainability educator	Connects agriculture to education
Create a visual resource	Builds creativity and communication
Learn about soil and water care	Connects farming to environment
Reflection and journaling	Builds emotional insight and awareness
Visit local farm or outreach site	Connects agriculture to wellbeing
Collaborative planning session	Encourages teamwork and ownership
