

# WORKPLACES WITH CLEAR COMMUNICATION

Clear communication not only supports teamwork and improves productivity, it creates a safer space to ask questions, learn confidently and feel included.

## Reassurance

Reassure that it's okay not to know everything right away and that learning from mistakes are part of the process. This kind of understanding builds confidence, encourages questions and helps young First Nations employees grow.

## Clarity

Speaking clearly, using plain language, and giving straightforward instructions helps prevent confusion and build confidence, especially for someone new to the workplace. Checking for understanding and encouraging questions shows you're approachable and invested in their success.

## Ask questions

Ask questions and encourage theirs. Showing a genuine interest in learning more will only contribute to building a positive workplace.
