

Shaping youth pathways

Our Vision

GMLLEN's vision is that every young person dreams big and can see clearer pathways to education and work

How we can help you

Work Based Learning (Year 10+ Students)

You can provide students with an opportunity to complete either Work Experience, Structured Workplace Learning, a School Based Apprenticeship or Traineeship at your business. We can assist with developing the structure of the placement, source students and answer all unknown questions.

Career Events (Year 9-12 Students)

Participate in local career events like Careers Day Out, attracting over **2500** local students eager to explore diverse businesses in the area, providing them with valuable insights and inspiration for their future career paths.

Industry Tours/Workplace Visits (Year 7-12 Students)

We can plan and coordinate workplace tours for student groups, speak at career events or attend events specifically aimed at teachers to keep their industry knowledge current.

Industry Panels (Year 7-12 Students)

Wanting to talk directly to students about your business and the different career opportunities? We can organise an industry panel with yourself and other local businesses to talk to students and get your business name out there.

Taster Programs (Year 9-12 Students)

A taster day is designed to give students a taste of what it's like to work in various professions. They might get to try out basic tasks under the guidance of experienced professionals, ask questions, and learn about the skills and tools required for each trade.
