

## HANDS ON – Farm operations – AGRICULTURE

STUDENT

### Overview:

It's a chance to enjoy the outdoors, learn new skills and discover how farming connects to the food on your plate

### For students who:

- Love being outdoors
- Enjoy working with animals, plants or machinery
- Enjoy routine and practical tasks
- Morrisby traits: Realistic-Practical (hands-on, outdoors-oriented, motivated by teamwork and routine)

### What you might do across the week:

- Safety induction and farm tour
- Help with feeding, fencing or yard work
- Shadow livestock managers and learn animal care
- See machinery and irrigation systems in action
- Try seasonal tasks like planting or harvesting

Activity	Purpose
Farm tour	Builds familiarity with environment
Assist with feeding or fencing	Builds trust and engagement
Shadow livestock manager	Builds animal health awareness
Assist with yard work or cleaning	Builds responsibility and teamwork
Machinery and maintenance overview	Connects tech to farming
Debrief and discussion	Encourages systems thinking
Observe cropping or pasture work	Connects farming to food systems
Assist with basic field task	Builds pride and contribution
